

Industry Group Presentation

1. The purpose of [this assessment](#) is to examine whether you have assimilated all the accumulated knowledge surrounding Software Testing in a way that you can apply this knowledge and respond to an industry tender to test a software system in the guise of a (company) group of testing professionals. You will be formed into groups such that each group will be a mock consulting test company who is responding to the tender. The project you will be bidding for is detailed in the Assignment. Your task will be to examine what the testing requirements are/should be and then develop a group presentation of a maximum of 20 minutes wherein as a group you will discuss your companies' approach to the testing tender requirements.
2. You should draw from the learning outcomes that you have assimilated from:
 1. lectures
 2. tutorials
 3. practical sessions
 4. your own independent research

and address aspects of your presentation with reference to these.

Ultimately, the "*best* test consulting group" will be awarded the job.

3. Your presentation will be marked according to the rubric below and will be used by experienced industry experts who represent the tendering company and who currently are employed as software test and quality managers or consultants and will mark your presentation.
4. The industry experts will also ask questions during or after the talk, addressed to potentially each member of the group.
5. There is a maximum of 6 people in a group. Students may self-assign themselves to groups once they have discussed and formed the groups.
6. You should *change the name of your group* on Canvas to the one you will use as part of the assignment.
7. Ensure that you have **two hard copies** of your overheads **to give to the assessors** just prior to your presentation.
8. In order to facilitate marking, each group must create and print an **A3** sheet. It is very important that you use real and recognisable images for each member of your group. **Print** the A3 sheet in Colour **and present this**, together with your overheads to the industry expert. Use your real official names (no nicknames please).
9. Submit a PDF of your overheads as well as the filled-in A3 PDF sheet here on Canvas.
